

RheoSense

Simply Precise™

Manufacturing Technician

Job Opening at RheoSense, Inc. | San Ramon, CA

We are seeking an entry level manufacturing technician who will be expected to use a combination of mechanical and electrical hand-on skills in the productions department. The ideal candidate will be expected to have the eagerness to learn and improve current manufacturing processes.

Responsibilities:

- Product assembly and testing
- Standard documentation and revision of SOPs
- Implement and sustain a stable internal ordering process of production components
- Conduct incoming inspection of all parts and working with vendors to improve quality
- Work with suppliers for RMAs and continuous quality improvement
- QC of finished products
- Assist in improving and handling high demand packing/shipping
- Help monitor and maintain stable inventory of production parts

Qualifications:

- Internship or general experience in a production/laboratory setting
- Extremely detail oriented
- Must enjoy working and learning the ins and outs of various products
- Sensitivity to quality; capabilities to detect variance in product batches
- Be adaptable to fast paced and high growth environment
- Work well independently as well as in a group setting

Compensation:

- Excellent total compensation package plus excellent health and dental benefits
- Excellent opportunities for career growth
- Financial Benefits including 401k Investment Savings Plan
- Stock options
